

How to Make Your Website Encourage Donations, Volunteering, and Action

Presented by **Jantcu**

MNN #ABridgeToBetter
#MNNConference

Donations.

- Trust / Security
- Branding
- Giving Levels
- Recurring Payments
- Anchoring
- Emotional Response
- Storytelling
- Urgency

Volunteering.

- “Job” Descriptions
- Volunteer Stories
- Intake Forms
- Duration
- Commitment
- Impact
- Motivations
- Posting Wins

Action.

- Split Testing
- Reciprocity
- 80/20 Rule
- Reading Levels
- Accessibility
- User Control
- Focused Content
- Performance

Donations.

Volunteering.

Action.

Trust & security.

- Design quality matters
- SSL/TLS: Let's Encrypt + Certbot
- Visible phone # and address
- Use images of real people
- Display third party endorsements

6x

Your Conversions On Donation Forms

- maintain branding (logo, fonts, colors)
- fully integrate into website
- do not redirect to a third party payment processor

- Network For Good Online Giving Index

Giving Levels.

Select an amount to give.

\$25

\$50

\$100

\$200

Other Amount

Monthly
contribution

Anchoring impacts donation amounts.

Would you be willing to pay...

\$5 → \$20

\$400 → \$143

Recurring donations.

On average, donors who set up a **recurring gift** donate 42 percent more per year than those who give a one-time donation.

- Constant Contact

Use images that create
an **emotional response**.

People donate with their
hearts.

<https://app.sli.do/event/ae9hksam>

A) Food shortages in Malawi are affecting more than three million children. In Zambia, severe rainfall deficits have resulted in a 42% drop in maize production from 2000. As a result, an estimated three million Zambians face hunger. Four million Angolans — one-third of the population — have been forced to flee their homes. More than 11 million people in Ethiopia need immediate food assistance.

B) Any money that you donate will go to Rokia, a seven-year-old girl who lives in Mali in Africa. Rokia is desperately poor and faces a threat of severe hunger, even starvation. Her life will be changed for the better as a result of your financial gift. With your support, and the support of other caring sponsors, Save the Children will work with Rokia's family and other members of the community to help feed and educate her, and provide her with basic medical care.

slido

Which cause are you more likely to donate to?

① Start presenting to display the poll results on this slide.

**Appeals
to
the
Heart**

**Appeals
to
the
Head**

<http://knowledge.wharton.upenn.edu/article/to-increase-charitable-donations-appeal-to-the-heart-not-the-head/>.

“Having more than one click on your donations form reduces conversion rates by an average of 35%.”

- Transform Foundation

Easy donation forms.

- Just a click away
- Lean data collection
- Confirmation email
- Branded

Transparency.

- Tie donations to a specific objective
- Disclose how donations are used
- Set tangible goals
- Share goals and when you reach them

Add some **urgency!**

Give a time limit for matching funds and/or hitting a goal for a specific objective.

Let supporters help.

Consider allowing individual fundraising pages.

Donations.

Volunteering.

Action.

Volunteer stories.

- Share volunteers stories
- Ask volunteers to share
- Emphasis strength of your group
- Use a video as a recruitment tool
- Show volunteer impact on the cause
- Easy sign-up & activities

Define the commitment.

Set clear expectations with a “job” description and eliminate vague or non-actionable statements.

Questions to consider include:

- How do they get involved?
- What would they be doing?

Convert better on intake forms.

- Make it easy to find
- Limit required information

A diagram illustrating a simplified intake form. It consists of four yellow rectangular boxes with rounded corners. The top row contains two boxes: the left one has a small pink horizontal bar at the bottom, and the right one is empty. The bottom row contains a single, wider yellow box centered below the two boxes above it.

“When an 11-field form was reduced to just 4 fields, the organization experienced a 160% lift in form completions.”

- Unbounce

Start conversations with social media.

Choosing the right channels

- Facebook
- Instagram
- Snapchat
- Twitter
- LinkedIn
- TikTok
- YouTube

Pareto Principle (80/20 Rule)

80% of the time you should be providing value.

Reserve only **20%** for promoting services.

Focus on their benefits, not your needs.

Find their secondary and tertiary motivations:

- build resume
- sharpen skills
- meet new people

Long vs short duration.

“Microvolunteering takes a simple idea – that people are more likely to volunteer their time in **short and convenient, bite-sized chunks** – and turns it into a new approach to community action. It offers volunteers a series of easy tasks that can be done anytime, anywhere, on your own terms.”

- Donorbox

Provide opportunities for
different levels of
engagement to fit
individual preferences.

Don't skip orientation just because you're remote.

- Make introductions
- Provide support / resources

Share volunteer successes.

Shows appreciation for current volunteers and helps attract new ones.

- volunteer of the month
- completed projects
- funds raised

Since April 21, 2015 **responsive design** has simply become “design.”

“Content is like water”

-Josh Clark

Donations.

Volunteering.

Action.

Don't just ask for someone's email, **give** them something they want **first**.

Nobody will praise you for
complex writing.

They judge you by the
clarity of your **message**.

Eliminate distractions.

- Large text with good contrast
- Correct spelling / grammar
- Imagery that matches text
- Simple language
- Clear calls to action

Shoot for a 7th grade reading level

Add headings, write shorter sentences and paragraphs, and use less complex versions of common words (Example: “Use” vs. “Utilize”)

- <https://hemingwayapp.com/>
- <https://readable.com/>

Accessibility wins.

1. Alternative text
2. Descriptive links
3. Color contrast
4. Proper HTML
5. Screenreader testing
6. Captions for videos

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

F12

Contrast — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio.

Navigation — These are opportunities to improve keyboard navigation in your application.

▲ Heading elements are not in a sequentially-descending order

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

Reduce or eliminate things that take control away from users.

- Carousels
- Autoplaying videos
- Custom scrolling
- Fly-ins
- Popups / modals

Don't fill the screen with unrelated content.

- Twitter feeds
- Latest news / events
- Calls-to-action for other services

Choose the right technology.
